BeeConnected

Now every **beekeeper** can **BeeConnected**

BeeConnected, the new web-based communication system between farmers and beekeepers is now open to all beekeepers to register and to receive alerts from local farmers of insecticide spraying events.

BeeConnected is a nationwide initiative that provides a more efficient and effective way for farmers to inform beekeepers of their intention to apply an insecticide.

Alerts from farmers will tell local beekeepers by e-mail:

- when spraying will occur,
- the crop being treated,
- the compound being applied
- and enable appropriate mitigating action to be taken

In addition to receiving accurate and up to date information of a spray event happening in the area **BeeConnected** provides direct contact from local farmers and provides the opportunity to establish a relationship with them.

BeeConnected is a joint venture under the Voluntary Initiative between the BBKA, National Farmers Union and Crop Protection Association.

Register now for the system launch at:
